

The Journal of
Experimental Biology

The Journal of Experimental Biology

EDITED BY

J. GRAY and J. A. RAMSAY

ASSISTED BY

THE HON. SECRETARIES, SOCIETY FOR
EXPERIMENTAL BIOLOGY

VOLUME XXX

U. OF I.
LIBRARY

CAMBRIDGE
AT THE UNIVERSITY PRESS

1953

Published for the Company of Biologists, Limited

*Printed in Great Britain at the University Press, Cambridge
(Brooke Crutchley University Printer)
and published by the Cambridge University Press*

London: Bentley House, N.W. 1

American Branch: New York

Agents for Canada, India, and Pakistan: Macmillan

CONTENTS

No. 1. MARCH 1953

PAGE

J. A. RAMSAY, R. H. J. BROWN AND S. W. H. W. FALLOON. Simultaneous determination of sodium and potassium in small volumes of fluid by flame photometry. (With Plate 1)	1
E. M. DEUCHAR. The regional properties of amphibian organizer tissue after disaggregation of its cells in alkali. (With Plate 2)	18
R. C. CAMPBELL, J. L. HANCOCK AND LORD ROTHSCHILD. Counting live and dead bull spermatozoa	44
J. L. HANCOCK. The spermatozoa of sterile bulls. (With Plates 3 and 4)	50
LORD ROTHSCHILD. The fertilization reaction in the sea-urchin. The induction of polyspermy by nicotine. (With Plate 5)	57
P. FATT AND A. M. WOODIN. The release of phosphate from the electric organ of <i>Torpedo</i>	68
J. A. RAMSAY. Exchanges of sodium and potassium in mosquito larvae	79
R. H. J. BROWN. The flight of birds. II. Wing function in relation to flight speed. (With Plates 6 and 7)	90
T. O. BROWNING. The influence of temperature and moisture on the uptake and loss of water in the eggs of <i>Gryllulus commodus</i> Walker (Orthoptera-Gryllidae)	104
OLIVER R. BARCLAY. Some aspects of the mechanics of mammalian locomotion	116
G. HOYLE. Potassium ions and insect nerve muscle	121
C. A. G. WIERSMA, E. FURSHPAN AND E. FLOREY. Physiological and pharmacological observations on muscle receptor organs of the crayfish, <i>Cambarus clarkii</i> Girard. (With Plate 8)	136

No. 2. JUNE 1953

A. E. NEEDHAM. The central nervous system and regeneration in Crustacea	151
A. STANWORTH AND E. J. NAYLOR. Polarized light studies of the cornea. I. The isolated cornea	160
A. STANWORTH. Polarized light studies of the cornea. II. The effect of intra-ocular pressure	164
D. W. EWER AND S. H. RIPLEY. On certain properties of the flight muscles of the Orthoptera. (With Plate 9)	170
LORD ROTHSCHILD. A new method of measuring the activity of spermatozoa	178

	PAGE
I. G. WHITE. The effect of washing on the motility and metabolism of ram, bull and rabbit spermatozoa	200
PEGGY E. ELLIS. The gregarious behaviour of marching <i>Locusta migratoria migratorioides</i> (R. & F.) hoppers	214
H. MUNRO FOX AND JASMINE SIDNEY. The influence of dissolved oxygen on the respiratory movements of caddis larvae	235
H. MUNRO FOX AND YVONNE MITCHELL. Relation of the rate of antennal movement in <i>Daphnia</i> to the number of eggs carried in the brood pouch	238
G. V. T. MATTHEWS. Sun navigation in homing pigeons	243
G. V. T. MATTHEWS. The orientation of untrained pigeons: a dichotomy in the homing process	268
JAMES D. ROBERTSON. Further studies on ionic regulation in marine invertebrates	277

No. 3. SEPTEMBER 1953

R. L. C. PILGRIM. Osmotic relations in molluscan contractile tissues. I. Isolated ventricle-strip preparations from lamellibranchs (<i>Mytilus edulis</i> L., <i>Ostrea edulis</i> L., <i>Anodonta cygnea</i> L.)	297
R. L. C. PILGRIM. Osmotic relations in molluscan contractile tissues. II. Isolated gill preparations from lamellibranchs (<i>Mytilus edulis</i> L., <i>Ostrea edulis</i> L., <i>Anodonta cygnea</i> L.)	318
E. B. EDNEY. The temperature of woodlice in the sun	331
R. HOLMES. The occurrence of blood groups in cats. (With Plate 10)	350
J. A. RAMSAY. Active transport of potassium by the Malpighian tubules of insects	358
G. V. T. MATTHEWS. Navigation in the Manx shearwater	370
J. M. MITCHISON. A polarized light analysis of the human red cell ghost. (With Plate 11)	397
P. FATT AND B. KATZ. Distributed 'end-plate potentials' of crustacean muscle fibres	433
GARTH CHAPMAN. Studies on the mesogloea of coelenterates. II. Physical properties	440

No. 4. DECEMBER 1953

E. R. TRUEMAN. Observations on certain mechanical properties of the ligament of <i>Pecten</i>	453
M. R. A. CHANCE. Central nervous function and changes in brain metabolite concentration. III. Glycogen in the normal behaviour of mice	468
C. ELLENBY. Oxygen consumption and cell size. A comparison of the rate of oxygen consumption of diploid and triploid prepupae of <i>Drosophila melanogaster</i> Meigen	475

	PAGE
HUGH CLARK. Metabolism of the black snake embryo. I. Nitrogen excretion	492
HUGH CLARK. Metabolism of the black snake embryo. II. Respiratory exchange	502
M. M. SWANN AND J. M. MITCHISON. Cleavage of sea-urchin eggs in colchicine. (With Plates 12 and 13)	506
J. M. MITCHISON. Microdissection experiments on sea-urchin eggs at cleavage. (With Plates 14 and 15)	515
JANET E. HARKER. The diurnal rhythm of activity of mayfly nymphs	525
LORD ROTHSCHILD AND H. BARNES. The inorganic constituents of the sea-urchin egg	534
JANET VIVIAN PASSONNEAU AND CARROLL M. WILLIAMS. The moulting fluid of the Cecropia silkworm	545
A. CARDIN AND M. L. MEARA. The lipids of sea-urchin semen	561
G. PARRY. Osmotic and ionic regulation in the isopod crustacean <i>Ligia oceanica</i>	567
G. A. KERKUT. The forces exerted by the tube feet of the starfish during locomotion	575
E. W. KNIGHT-JONES. Laboratory experiments on gregariousness during setting in <i>Balanus balanoides</i> and other barnacles. (With Plate 16)	584
Index of Subjects	599
Index of Authors	602

INDEX OF SUBJECTS

A

Amphibian:

See Organizer tissue

Anodonta cygnea:

See Lamellibranchs

Antennal movement:

See *Daphnia*

B

Balanus balanoides:

Laboratory experiments on gregariousness during setting in, and other barnacles (KNIGHT-JONES) 584

Barnacles:

See *Balanus balanoides*

Behaviour:

The gregarious, of marching *Locusta migratoria migratorioides* (R. & F.) hoppers (ELLIS) 214

— See also Mice

Birds:

The flight of. II. Wing function in relation to flight speed (BROWN) 90

Black snake:

Metabolism of the, embryo. I. Nitrogen excretion (CLARK) 492

— II. Respiratory exchange (CLARK) 502

Blood groups:

The occurrence of, in cats (HOLMES) 350

Brain metabolite concentration:

Central nervous function and changes in. III. Glycogen in the normal behaviour of mice (CHANCE) 468

Bull:

See Spermatozoa

C

Caddis larvae:

The influence of dissolved oxygen on the respiratory movements of (FOX and SIDNEY) 235

Cambarus clarkii:

Physiological and pharmacological observations on muscle receptor organs of the crayfish (WIERSMA, FURSPAN and FLOREY) 136

Cats:

The occurrence of blood groups in (HOLMES) 350

Cecropia silkworm:

The moulting fluid of (PASSONNEAU and WILLIAMS) 545

Central nervous function:

and changes in brain metabolite concentration. III. Glycogen in the normal behaviour of mice (CHANCE) 468

Central nervous system:

and regeneration in Crustacea (NEEDHAM) 151

Cleavage:

See Sea-urchin eggs

Coelenterates:

Studies on the mesogloea of. II. Physical properties (CHAPMAN) 440

Colchicine:

See Sea-urchin eggs

Cornea:

Polarized light studies of the. I. The isolated cornea (STANWORTH and NAYLOR) 160

— II. The effect of intra-ocular pressure (STANWORTH) 164

Crayfish:

See *Cambarus clarkii*

Crustacea:

The central nervous system and regeneration in (NEEDHAM) 151

— See also Isopod crustacean

Crustacean muscle fibres:

Distributed 'end-plate potentials' of (FATT and KATZ) 433

D

Daphnia:

Relation of the rate of antennal movement in, to the number of eggs carried in the brood pouch (FOX and MITCHELL) 238

Diurnal rhythm:

of activity of mayfly nymphs (HARKER) 525

Drosophila melanogaster:

Oxygen consumption and cell size. A comparison of the rate of oxygen consumption of diploid and triploid prepupae of (ELLENBY) 475

E

Eggs:

The influence of temperature and moisture on the uptake and loss of water in the, of *Gryllulus commodus* Walker (Orthoptera-Gryllidae) (BROWNING) 104

— See also *Daphnia* and Sea-urchin egg(s)

Electric organ:

See *Torpedo*

Embryo:

See Black snake

'End-plate potentials':

See Crustacean muscle fibres

Excretion:

See Black snake

F

Fertilization reaction:

See Sea-urchin

Flight of birds:

- II. Wing function in relation to flight speed
(BROWN) 90

Flight muscles:

See Orthoptera

G**Glycogen:**

See Mice

Gregariousness:

- Laboratory experiments on, during setting
in *Balanus balanoides* and other barnacles
(KNIGHT-JONES) 584

— See also Behaviour

Gryllulus commodus:

See Eggs

H**Homing pigeons:**

See Pigeons

Human red cell ghost:

- A polarized light analysis of the (MITCHISON)
397

I**Insects:**

- Active transport of potassium by the Malpighian tubules of (RAMSAY) 358
— See also Potassium ions

Ionic regulation:

- Further studies on, in marine invertebrates
(ROBERTSON) 277

— See also Osmotic and ionic regulation

Isopod crustacean:

- Osmotic and ionic regulation in the, *Ligia oceanica* (PARRY) 567

L**Lamellibranchs:**

- Osmotic relations in molluscan contractile tissues. I. Isolated ventricle-strip preparations from (*Mytilus edulis* L., *Ostrea edulis* L., *Anodonta cygnea* L.) (PILGRIM) 297

— II. Isolated gill preparations from (*Mytilus edulis* L., *Ostrea edulis* L., *Anodonta cygnea* L.) (PILGRIM) 318

Ligia oceanica:

See Isopod crustacean

Lipids:

- of sea-urchin semen (CARDIN and MEARA)
561

Locomotion:

- The forces exerted by the tube feet of the starfish during (KERKUT) 575
— Some aspects of the mechanics of mammalian (BARCLAY) 116

Locusta migratoria migratorioides:

See Behaviour

Loss of water:

See Eggs

M**Malpighian tubules:**

- Active transport of potassium by the, of insects (RAMSAY) 358

Mammalian locomotion:

See Locomotion

Manx shearwater:

- Navigation in the (MATTHEWS) 370

Marine invertebrates:

See Ionic regulation

Mayfly nymphs:

- The diurnal rhythm of activity of (HARKER)
525

Mesogloea:

See Coelenterates

Metabolism:

- of the black snake embryo. I. Nitrogen excretion (CLARK) 492
— II. Respiratory exchange (CLARK) 502
— The effect of washing on the motility and, of ram, bull and rabbit spermatozoa (WHITE) 200

Mice:

- Central nervous function and changes in brain metabolite concentration. III. Glycogen in the normal behaviour of (CHANCE) 468

Microdissection:

- experiments on sea-urchin eggs at cleavage (MITCHISON) 515

Molluscan contractile tissues:

See Osmotic relations

Mosquito larvae:

- Exchanges of sodium and potassium in (RAMSAY) 79

Motility:

See Spermatozoa

Moulting fluid:

- of the Cecropia silkworm (PASSONNEAU and WILLIAMS) 545

Muscle receptor organs:

- Physiological and pharmacological observations on, of the crayfish, *Cambarus clarkii* Girard (WIERSMA, FURSPAN and FLOREY) 136

Mytilus edulis:

See Lamellibranchs

N**Navigation:**

See Manx shearwater and Pigeons

Nicotine:

See Sea-urchin

Nitrogen excretion:

See Black snake

O**Organizer tissue:**

- The regional properties of amphibian, after disaggregation of its cells in alkali (DEUCHAR) 18

Orientation:

See Pigeons

Orthoptera:

- On certain properties of the flight muscles of the (EWER and RIPLEY) 170
— See also Eggs

- Osmotic and ionic regulation:**
in the isopod crustacean *Ligia oceanica* (PARRY) 567
- Osmotic relations:**
in molluscan contractile tissues. I. Isolated ventricle-strip preparations from lamelli-branches (*Mytilus edulis* L., *Ostrea edulis* L., *Anodonta cygnea* L.) (PILGRIM) 297
— II. Isolated gill preparations from lamelli-branches (*Mytilus edulis* L., *Ostrea edulis* L., *Anodonta cygnea* L.) (PILGRIM) 318
- Ostrea edulis:**
See Lamellibranchs
- Oxygen:**
See Caddis larvae
- Oxygen consumption:**
and cell size. A comparison of the rate of oxygen consumption of diploid and triploid prepupae of *Drosophila melanogaster* Meigen (ELLENBY) 475
- P**
- Pecten:**
Observations on certain mechanical properties of the ligament of (TRUEMAN) 453
- Phosphate:**
See *Torpedo*
- Photometry:**
Simultaneous determination of sodium and potassium in small volumes of fluid by flame (RAMSAY, BROWN and FALLOON) 1
- Pigeons:**
Sun navigation in homing (MATTHEWS) 243
— The orientation of untrained: a dichotomy in the homing process (MATTHEWS) 268
- Polarized light analysis:**
of the human red cell ghost (MITCHISON) 397
- Polarized light studies:**
See Cornea
- Polyspermy:**
See Sea-urchin
- Potassium:**
See Malpighian tubules, Mosquito larvae and Photometry
- Potassium ions:**
and insect nerve muscle (HOYLE) 121
- Prepupae:**
See *Drosophila melanogaster*
- R**
- Rabbit:**
See Spermatozoa
- Ram:**
See Spermatozoa
- Regeneration:**
See Crustacea
- Respiratory exchange:**
See Black Snake
- Respiratory movements:**
See Caddis larvae
- S**
- Sea-urchin:**
The fertilization reaction in the. The induction of polyspermy by nicotine (ROTHSCHILD) 57
- Sea-urchin egg:**
The inorganic constituents of (ROTHSCHILD and BARNES) 534
- Sea-urchin eggs:**
Cleavage of, in colchicine (SWANN and MITCHISON) 506
— Microdissection experiments on, at cleavage (MITCHISON) 515
- Sea-urchin semen:**
The lipids of (CARDIN and MEARA) 561
- Silkworm:**
See Cecropia silkworm
- Snake:**
See Black snake
- Sodium:**
See Mosquito larvae and Photometry
- Spermatozoa:**
Counting live and dead bull (CAMPBELL, HANCOCK and ROTHSCHILD) 44
— of sterile bulls (HANCOCK) 50
— A new method of measuring the activity of (ROTHSCHILD) 178
— The effect of washing on the motility and metabolism of ram, bull and rabbit (WHITE) 200
- Starfish:**
The forces exerted by the tube feet of the, during locomotion (KERKUT) 575
- T**
- Temperature:**
of woodlice in the sun (EDNEY) 331
— See also Eggs
- Torpedo:**
The release of phosphate from the electric organ of (FATT and WOODIN) 68
- Tube feet:**
See Starfish
- U**
- Uptake of water:**
See Eggs
- W**
- Woodlice:**
The temperature of, in the sun (EDNEY) 331
